	C	ancel	Save

#### **Voice Resource Management**

### **Confirm Audio Format**

If the audio cannot be uploaded due to a format error, Use the format detection tool

https://www.strerr.com/cn/filetype.html to see what the data format is

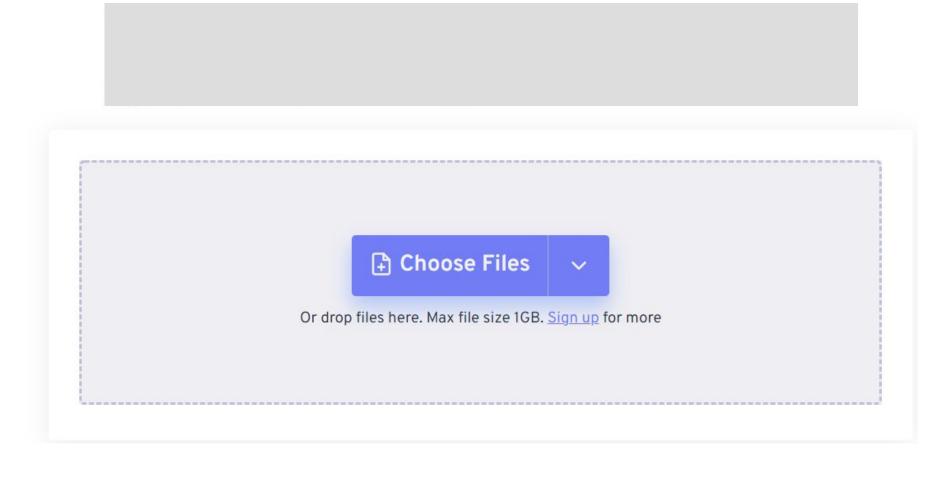

Welcome, this tool can detect file extension, file type without extension, file mime type  $% \left( {{{\mathbf{x}}_{i}}} \right)$ 

Select file

If the file is an MP4 file, you can use the online conversion tool <u>https://www.freeconvert.com/audio-converter</u> to convert it to an MP3 file and upload it

### Audio Converter

The best web app to convert audio files online.

# **Al Voice Robot Operation**

## Step.1 Login AboTALK

#### Link: https://abotalk.com/#/login

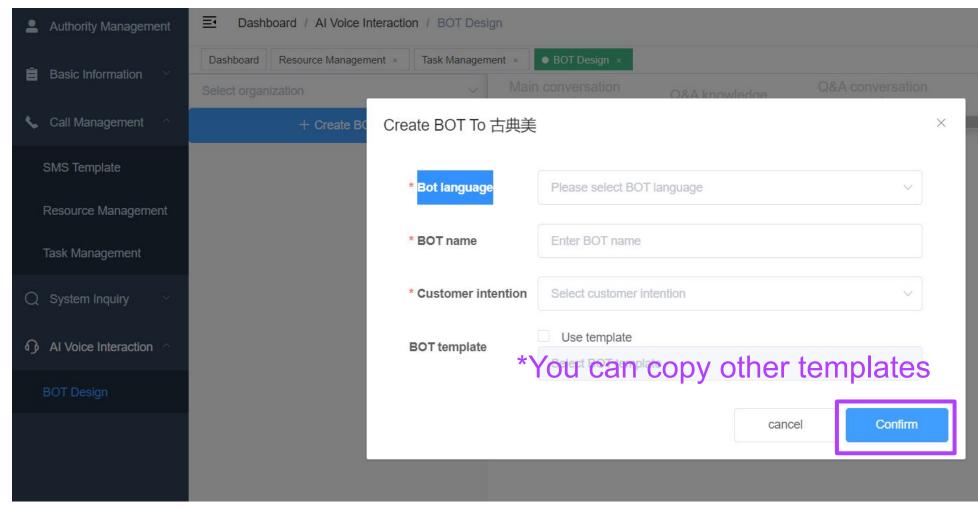

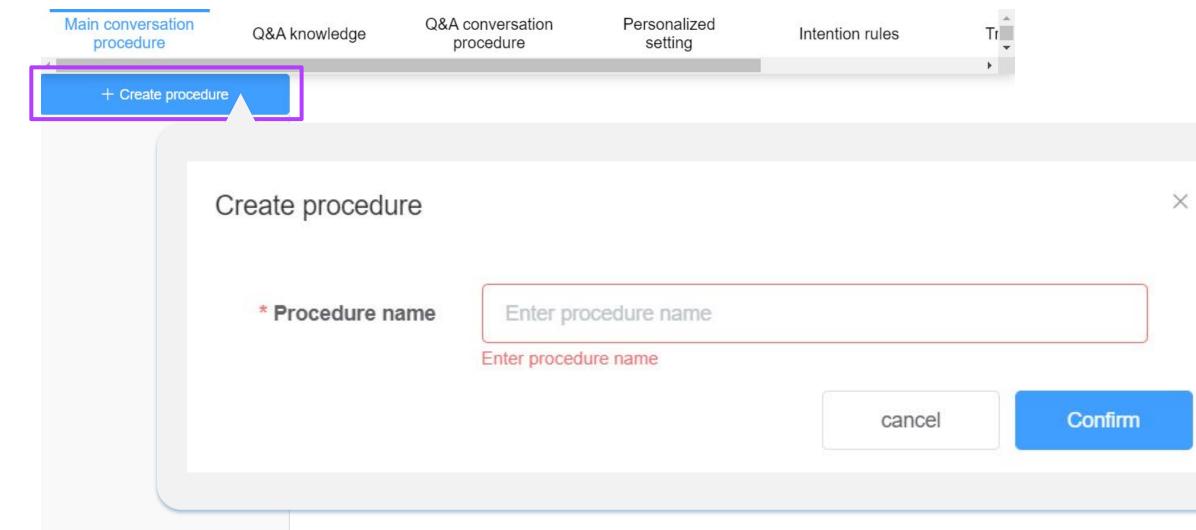

## Step.2 **Creating BOT Robot Code**

1. Click "AI Voice Interaction" V "BOT Design" V "+Create BOT"

2 Click

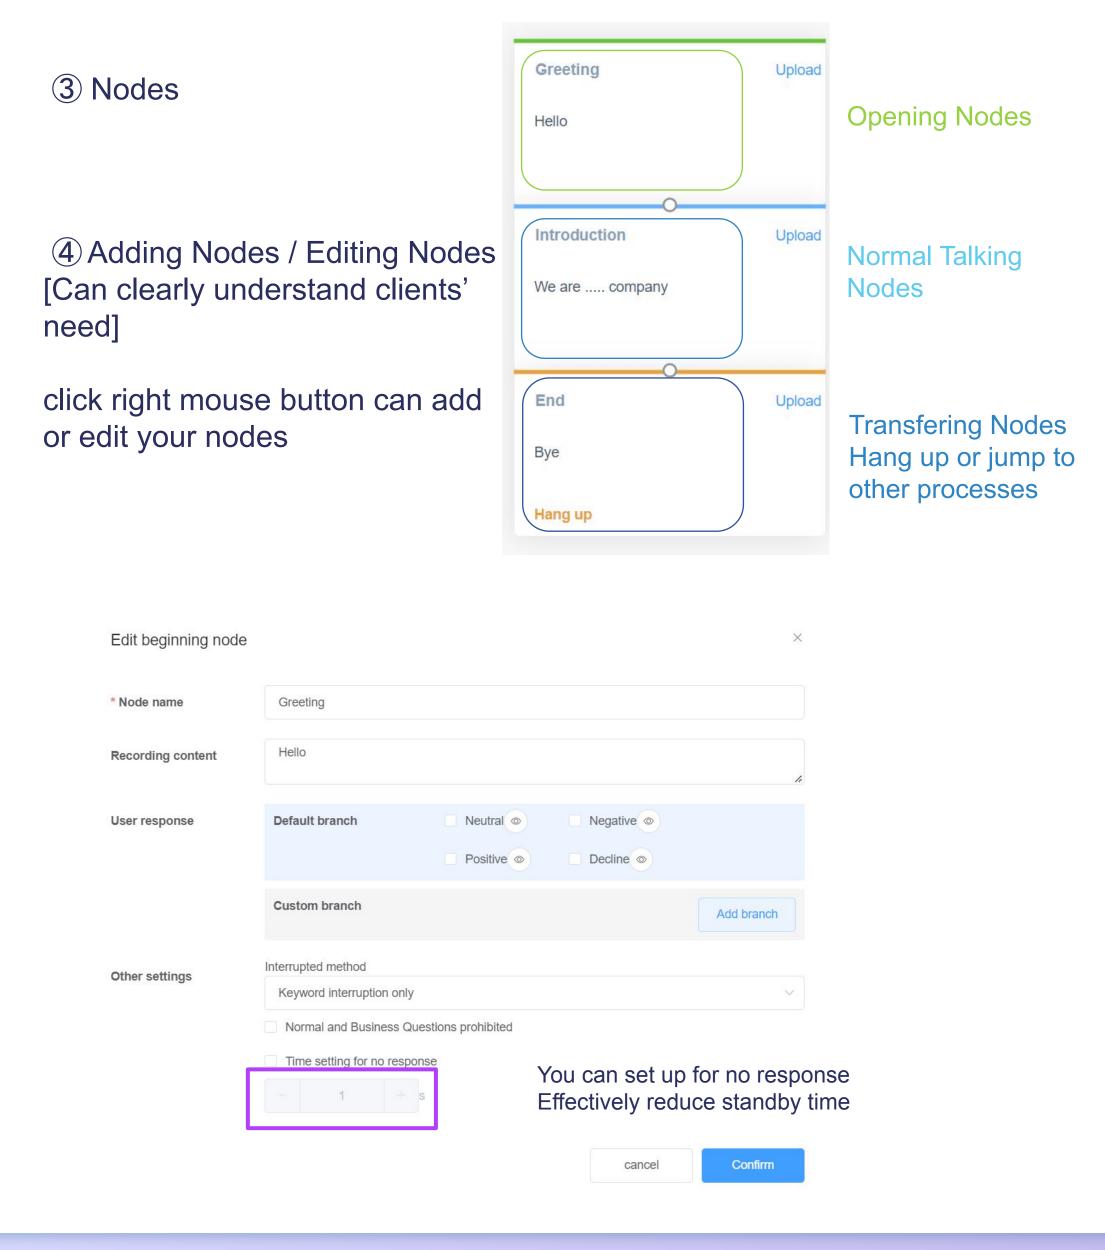

"+Create procedure"

Add branch				×
* Branch name	Enter branch name	ou have to add "	/ " betwee	n your keywords
Keyword(s)	Insert keywords and pre	ss Enter(Multiple keywords o	can be segmente	d by slashes)
	Copy selected keywords	Delete selected keywords	Select all keyw	rords
Attribute	Neutral			$\sim$
			cancel	Confirm

## ⑤ Add Jump NodeYou can select hang up/ jump back to forward procedures

Edit jump node			>
* Node name	Greeting		
Recording content	Hello		
Forward to	Select knowledge		~
		cancel	Confirm

## Step.3 Add Q&A knowledge

#### Customers ask "non system default questions"

(e.g. how much is the price, are there any preferential activities, and where is the location.....)

#### 1 Add Knowledge - Can design customer's assumed questions and keyword

Main conversa procedure	$() \times \Delta$	knowledge	Q&A conversation procedure	Personalized setting	Intention rules
Default question	ons 🗸				
Q Search	+ Add	Total 4	10/page ~ < 1	> Go to 1	
	Code	Add knowledg	ge		
	SYS-Q-01	* Title	Enter title		
	SYS-Q-02	Туре	Business questio	ns	~
	SYS-Q-03	Keyword(s)	Insert keywords a	and press Enter(Multiple keywords can	be segmented by slashes)
	SYS-Q-04	Answering Standard ar Other desig	nswer Edit standard an	Q&A procedure	ds Select all keywords

ld knowledge			
* Title	Enter title		
Туре	General questions		~
Keyword(s)	Insert keywords and press E	Enter(Multiple keywords can be se	egmented by slashes)
	Copy selected keywords	Delete selected keywords	Select all keywords
Answering mode	Answer directly Q&A proceed	dure	
Standard answer	Edit standard answer		
Other design	Priority over branches		
			cancel Confirm

## ② Complex Questions – Setting "Q&A conversation procedure" The editing is as same as Main conversation procedure

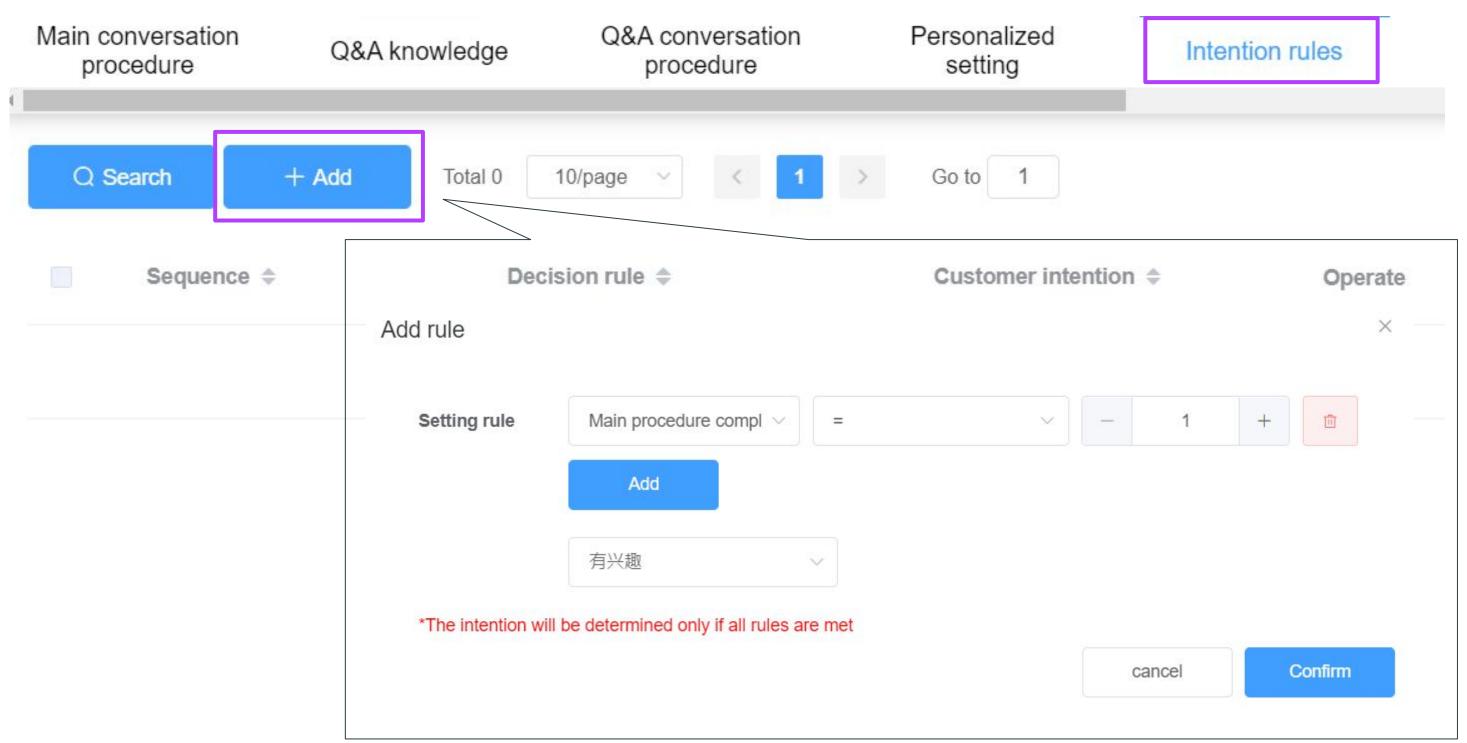

Main conversation procedure	Q&A knowledge	Q&A conversation procedure	Personalized setting	Intention rules
+ Create procedure				
Copy Edit Delete		Greeting	Upload	
Test		Hello		[
		0		
		Introduction	Upload	
		We are company		

## Step.4 **Personalized Setting**

When the customer picks up the phone and the robot dials the voice, if there is no response within the set time, the system will judge it as "no response from the customer"

# Step.5 **Add Intention Rules** Classify customers by calling status

- "+Add" 1.
- Set your rules 2.
- 3. Select the intention classification, you can customize the desired intention in the basic information-customer intention

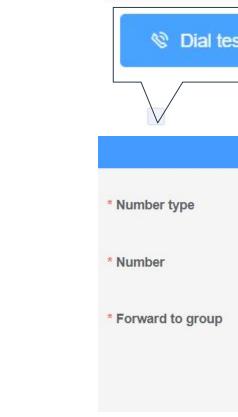

4	Main conversation procedure	Q&A knowledge	Q&A conversation procedure	Personalized setting	Intention rules
	Client no response	Time setting	- 7.0 + Second(s)		
	Hold duration	Time setting	- 60.0 + Second(s)	*You can s	set the time

#### **AI Voice Robot Operation**

## Step.6 **Start your test**

Before the check, you can test whether your templates are working or not, and you can modify them immediately. Here are "Dial Test" and "Text Test".

status

## Step.7 **Publish Verification**

The operator will review whether the voice content violates the specification, you can start your dial after "Approved"

Q Se

Recordi progres

Nam

## **ep.9** arch your dial record

#### "System Inquiry" > "Dial Record"

#### **AI BOT Jump Nodes Functions**

① Jump back to the main procedure

② Jump to the specified procedure: If multiple procedures are set, you can choose which procedure to jump to

Edit jump node			×
* Node name			
Recording content	Enter content		1.
Forward to	Back to main procedure		~
		cancel	Confirm

③Jump to manual customer service: after the softphone is set, you can choose to jump to the designated seat group when publishing tasks

Edit jump node			×
* Node name			
Recording content	Enter content		1.
Forward to	Forward to extension		~
		cancel	Confirm

④ Hang up and send SMS: you need to set up the abosend platform and connect the enterprise account. You can delay or send a text message directly according to your intention.

Edit jump node			2
* Node name			
Recording content	Enter content		
Forward to	Hang up and send sms		~
* Trigger SMS intent	Trigger SMS intent		~
* Use template	Use template		~
	Send delay		
		cancel	Confirm

### **Audio Verification Code**

- • Do not need manual customer service
- Customers can submit via HTTP connection
- •After the called answer, press play verification code to record
- •Won't generate customers' intention

•

• •When setting HTTP, you must select the called number or the calling number (if not set, it is the default random calling number)
